Summary

Software Engineer with 2+ years of experience at building large-scale backend platforms, with a strong ability to translate complex business needs into scalable technical solutions.

Experience

Amazon — Bengaluru, India
Software Development Engineer I — *Jan 2026 - Present*

- **Co-Shipping Incentive (end to end)**: Built a pre-ranking plugin in the offer-ranking system (1B+ requests/day). It calls an index API to find items that can ship together with the customer's cart and attaches an incentive amount to the offer. Projected impact: 2–3% unit-share uplift and multi-million-dollar annual shipping savings across 8 marketplaces.
- **Region Decommission**: Confirmed zero production traffic across metrics and logs over 2+ weeks, then decommissioned a deprecated AWS region end to end (CDK stacks, load-balancer relay configs, certificates, pipeline stages). This removed a full regional fleet and its recurring operational cost.
- **Replication Reliability**: Built a reconciliation Lambda and a reusable Java library that compare source and destination records, plus a Step Functions steady-state validator that runs composite-alarm and metric-threshold checks. Used across 60+ data replication workflows, replacing manual checks.
- **AI On-Call Analyzer**: Built an AI-native on-call analyzer that reads tickets, logs and runbooks to auto-generate triage summaries and root-cause suggestions. It reduced mean time to diagnose by approximately 20%.

Kickdrum Technologies — Bengaluru, India
Software Engineer — *Jul 2024 - Aug 2025*

- **Performance Assessment Tool**: Engineered the Feedback module using React and AWS Lambda, enabling seamless performance tracking for over 200 employees.
- **PAT Migration**: Migrated the performance-assessment platform from an always-on to a fully serverless AWS architecture, cutting infrastructure cost by 90% while holding scalability through peak cycles.
- **Workflow Optimization**: Restructured and optimized a ColdFusion-based recursive workflow, reducing message delivery time from 120+ minutes to under 35 minutes (70% improvement).
- **Mentorship**: Mentored 2 SDE interns, providing design guidance and code reviews, helping them ship their internship project within the timeline.

Kickdrum Technologies — Bengaluru, India
Software Developer Intern — *Jan 2024 - Jun 2024*

- **Observability**: Improved application observability by creating 5+ Datadog dashboards for backend APIs and complete GCP performance monitoring.
- **Test Automation**: Developed a Cypress-based automated framework for validating content, delivery triggers, and backend API responses, reducing manual QA cycles and ensuring reliable communication for 50,000+ students.
- **Internet Booking Engine**: Collaborated with a team of software developers to build and deploy a scalable Internet Booking Engine website using React.js, Spring Boot, and AWS services, enhancing performance and user experience.
- **POTW awards (2x)**: Won the Performer of the Week award twice during the 8-week project phase, among 30+ interns.

RM Applications — Remote
Software Developer Intern — *Jun 2023 - Sep 2023*

- **Membership Platform**: Developed the Email Blasting and File Upload & Preview modules for the membership platform, improving operational efficiency by 30%.
- **Search Functionality**: Designed a popup menu with a search functionality, reducing search time by 45% for users navigating through the membership system.

Education

UIET, Panjab University — Chandigarh, India
Bachelor of Engineering - Computer Science and Engineering; CGPA: 8.15/10 — *Nov 2020 - Jun 2024*

Technical Skills

Fundamentals: Data Structures & Algorithms, OOP, System Design, REST APIs, Git
Languages: C++, Java, JavaScript, TypeScript, SQL
AWS: Lambda, Step Functions, CloudWatch, S3, DynamoDB, RDS, IAM
Frameworks: Spring Boot, React.js, Node.js, Express.js
Databases: MongoDB, MySQL, PostgreSQL

Achievements

- Secured Rank 1 out of 230+ students in PUMEET examination at Panjab University, 2021.
- Finalist at the ReverseX Aptitude and Programming Contests in the 2025-26 Shaastra Competition at IIT Madras.
- Specialist on Codeforces (rating: 1524) and ranked Knight on LeetCode (top 4.4% with a rating of 1897).
